

Project Initialization and Planning Phase

Date	1 July 2026
Team ID	XXXXXX
Project Name	Smart Agricultural Production Optimization Engine (OptiCrop)
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand the customer's point of view. This Problem Statement template helps identify the real challenges faced by farmers while selecting suitable crops. It focuses on understanding the customer's needs so that an effective AI-based crop recommendation solution can be developed. By analyzing the customer's problems, the team can design a system that improves agricultural productivity and supports better farming decisions.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A farmer seeking suitable crop recommendations	Choose the best crop for my land	I don't know which crop matches my soil and weather conditions	Crop selection depends on soil nutrients, temperature, humidity, pH, and rainfall, making manual decisions difficult	Confused about selecting the right crop and worried about low agricultural productivity
